SAFETY DATA SHEET

	1. Identificatio			
Product identifier	Iron OUT (Powder)			
Other means of identification	Not available.			
Recommended use	Rust & Stain Remover			
Recommended restrictions	None known.			
Manufacturer/Importer/Supplier Manufacturer	/Distributor information			
Company name Address	Iron Out dba Summit Brands 6714 Pointe Inverness Way, Suite 200 Fort Wayne, IN 46804-7935 United States			
Telephone	260-483-2519			
E-mail	Not available.			
Emergency phone number	1-800-424-9300 (CHEMTREC)			
Supplier	See above.			
	2. Hazard identific	cation		
Physical hazards	Not classified.			
Health hazards	Acute toxicity, inhalation	Category 4		
	Serious eye damage/eye irritation	Category 1		
Environmental hazards	Not classified.			
WHMIS 2015 defined hazards	Not classified

Chemical name	Common name and synonyms	CAS number	%
Citric Acid		77-92-9	1 - 5*
Sodium carbonate		497-19-8	10 - 30*

Chemical name	Common name and synonyms	CAS number	%	
Sodium hydrosulfite		7775-14-6	15 - 40*	
Sodium metabisulfite		7681-57-4	10 - 30*	
Sodium sulfite		7757-83-7	1 - 5*	
All concentrations are in percent by	y weight unless ingredient is a gas. Gas concer	ntrations are in percent by volu	ime.	
Composition comments	US GHS: The exact percentage (concentration secret in accordance with paragraph (i) of §19 *CANADA GHS: The exact percentage (concentrade secret.	910.1200.		
	4. First-aid measures			
Inhalation	IF INHALED: Remove person to fresh air and CENTER or doctor if you feel unwell.	l keep comfortable for breathir	ig. Call a POISON	
Skin contact	Flush with cool water. Wash with soap and w	ater. Obtain medical attention	if irritation persists.	
Eye contact	IF IN EYES: Rinse cautiously with water for s and easy to do. Continue rinsing. Immediately			
Ingestion	Rinse mouth. Do not induce vomiting. If vomiting occurs naturally, have victim lean forward to reduce risk of aspiration. Never give anything by mouth if victim is unconscious or is convulsing. Obtain medical attention.			
Most important symptoms/effects, acute and delayed	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. Dusts may irritate the respirator tract, skin and eyes.			
Indication of immediate medical attention and special treatment needed	Provide general supportive measures and tre	at symptomatically. Symptoms	s may be delayed.	
General information	If you feel unwell, seek medical advice (show the label where possible). Ensure that medical personnel are aware of the material(s) involved and take precautions to protect themselves. Sho this safety data sheet to the doctor in attendance. Avoid contact with eyes and skin. Keep out of reach of children.			
	5. Fire-fighting measur	es		
Suitable extinguishing media	Water fog. Foam. Dry chemical powder. Carb	on dioxide.		
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.			
Specific hazards arising from the chemical	During fire, gases hazardous to health may be formed.			
Special protective equipment and precautions for firefighters	Self-contained breathing apparatus and full protective clothing must be worn in case of fire.			
Fire-fighting equipment/instructions	In case of fire and/or explosion do not breathers so without risk.	e fumes. Move containers fron	n fire area if you can do	
Specific methods	Use standard firefighting procedures and con	sider the hazards of other invo	lved materials.	
General fire hazards	No unusual fire or explosion hazards noted.			
Hazardous combustion products	May include and are not limited to: Oxides of sulfur. Oxides of carbon.			
	6. Accidental release meas	sures		

Personal precautions, protective equipment and emergency procedures Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Use only non-sparking tools. Dust deposits should not be allowed to accumulate on surfaces, as these may form an explosive mixture if they are released into the atmosphere in sufficient concentration. Wear appropriate protective equipment and clothing during clean-up. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

thods and materials for ntainment and cleaning up	Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area). Take precautionary measures against static discharge. Prevent entry into waterways, sewer, basement or confined areas. Stop the flow of material, if this is without risk.			
	Large Spills: Wet down with water and dike for later disposal. Shovel the material into waste container. Absorb spillage to prevent material damage. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water.			
		pillage and collect in suitable container for disposal. Wipe leece). Clean surface thoroughly to remove residual		
vironmental precautions	Never return spills to original containers for re-use. For waste disposal, see section 13 of the SE Avoid discharge into drains, water courses or onto the ground. Do not discharge into lakes, streams, ponds or public waters.			
	7. Handling and s	torage		
ecautions for safe handling	appropriate personal protective equipm	n and clothing. Avoid prolonged exposure. Wear ent. Wash hands thoroughly after handling. Use good this material. When using do not eat or drink.		
nditions for safe storage, luding any incompatibilities		unlight. Keep containers tightly closed in a dry, cool and original container. Store away from other materials. Keep

Biological limit values

No biological exposure limits noted for the ingredient(s).

Appropriate engineering controls	Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. If engineering measures are not sufficient to maintain concentrations of dust particulates below the Occupational Exposure Limit (OEL), suitable respiratory protection must be worn.		
Individual protection measures,	such as personal protective equipment		
Eye/face protection	Wear safety glasses with side shields (or goggles).		
Skin protection			
Hand protection	Impervious gloves. Confirm with reputable supplier first.		
Other	Wear suitable protective clothing. As required by employer code.		
Respiratory protection	Where exposure guideline levels may be exceeded, use an approved NIOSH respirator. Respirator should be selected by and used under the direction of a trained health and safety professional following requirements found in OSHA's respirator standard (29 CFR 1910.134), CAN/CSA-Z94.4 and ANSI's standard for respiratory protection (Z88.2).		
Thermal hazards	Not applicable.		
General hygiene considerations	When using, do not eat, drink or smoke. When using do not eat or drink.		

9. Physical and chemical properties

Appearance	Powder.
Physical state	Solid.
Form	Powder. Free flowing solid
Color	White
Odor	Mint
Odor threshold	Not available.
рН	Not available.
Melting point/freezing point	Not available.
Initial boiling point and boiling range	Not available.
Pour point	Not available.
Specific gravity	Not available.
Partition coefficient (n-octanol/water)	Not available.
Flash point	None
Evaporation rate	Not available.
Flammability (solid, gas)	Not available.
Upper/lower flammability or expl	losive limits
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Explosive limit - lower (%)	Not available.
Explosive limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	1.2 - 1.3 g/ml
Solubility(ies)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Not available.
Other information	
Explosive properties	Not explosive.
Oxidizing properties	Not oxidizing.

10. Stability and reactivity

Reactivity

Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
Chemical stability	Material is stable under normal conditions.
Conditions to avoid	Do not mix with other chemicals.
Incompatible materials	Strong oxidizing agents. Combustible material.
Hazardous decomposition products	May include and are not limited to: Oxides of sulfur. Oxides of carbon.

11. Toxicological information

Routes of exposure	Eye, Skin contact, Inhalation, Ingestion.
Information on likely routes of	exposure
Ingestion	May cause stomach distress, nausea or vomiting.
Inhalation	Harmful if inhaled.
Skin contact	Dust or powder may irritate the skin.
Eye contact	Causes serious eye damage.
Symptoms related to the physical, chemical and toxicological characteristics	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. Dusts may irritate the respiratory tract, skin and eyes.
